

# Ableton offers synth-nostalgia Pack as holiday giveaway for Live 10 users

Berlin, Germany, December 18, 2018

Ableton is offering all Live 10 users a festive Thank You in the shape of a free Pack of classic-synth-inspired instruments – [which you can download now from the Ableton site](#).

The Pack, named Singularities, makes use of single samples and finely tuned Simplifier/Sampler parameters to capture the sound and feel of vintage gear. Included are 40 Instrument Racks, plus MIDI clips and drum kits – enough to inspire a whole track.

Ableton's lead sound designer Huston Singletary developed the instruments, fine-tuning the more intricate features of Live's onboard devices (like filter, pitch and volume envelope slopes and key tracking) to recreate expressive and realistic playback reminiscent of the original hardware.

The instruments also recreate the quirks of classic samplers, whose single-sample playback offered a rawer and more digital signature sound.

## Availability

Singularities is free, and works with all editions of Ableton Live 10

– from Live Lite to Suite.

[The Pack is available to download now.](#)

## More about the Pack

You can read more about Singularities and check out demos on

## About Ableton

Ableton makes products for music makers to create, produce and perform music. These include Live, a software that combines traditional studio technologies with the freedom of working without a timeline; Push, a hardware instrument for hands-on playing and composing with Live; and Link, a technology that allows multiple devices to play in time together over a wireless connection.

Ableton was founded in 1999 by musicians in need of new creative tools. The first version of Live was released in 2001. The company is led by its founders from its headquarters in Berlin, and has additional offices in Los Angeles and Tokyo. About 300 people work at Ableton across the world.
