

Oi Oi Oi

Here is a lovely DR110, recorder thru nice preamps!
It's got accents for each sounds and you can pitch it.
kick snare and clap have pitch env modulation not the
cymbals and HHs.

I also added filer cut off control and filter distortion.
Then comes MISTER T and he'll huff and he'll puff and
he'll blow your little piggies drum machine in, but
nicely!

To install just drag the .adg file to ableton and save
the instrument, it will copy all files in your library,
then you can use and re use and re use...

Bisou

K
